

November 2026 | Version 4

ENVIRONMENTAL POLICY

PURPOSE

This policy communicates Tasmanian Ports Corporation's ("TasPorts") environmental commitments.

SCOPE

This policy applies to all TasPorts staff, contractors, customers, licensees, tenants, port users and members of the public undertaking, or planning to undertake, activities on TasPorts-owned, operated or managed land, berths and waters ("TasPorts facilities").

TasPorts' significant environmental aspects include air emissions, hydrocarbon spills, wastewater discharges, soil and marine sediment contamination, invasive aquatic species, carbon emissions, climate change risks, marine habitat disturbance, and light and noise pollution.

VALUES

PROUD
Proud to play our part, we follow through with courage and conviction.

CARE
To show care, we actively engage and listen.

TOGETHER
We don't go it alone, because we're better together.

SHARE
Information empowers, so we share it generously.

TRUST
We trust our people and processes, to deliver with integrity.

COMMITMENT

TasPorts is committed to protecting the environment, preventing pollution, using resources sustainably, and continually improving environmental performance through an effective Environmental Management System. The Environmental Management System aligns with EcoPorts and ISO 14001 international standards and embeds requirements into the organisation's business processes to support risk based decisions and controls.

Key commitments include:

- Identifying, assessing and reviewing significant environmental aspects and natural values.
- Embed environmental considerations into planning, procurement, infrastructure, operations and decision-making.
- Engaging with regulatory authorities, local communities, customers and stakeholders on environmental risks and opportunities.
- Building environmental awareness and shared responsibility through communication, training and inductions.
- Providing resources, training and support to implement effective controls and drive continual improvement.
- Complying with legal and other requirements and addressing deficiencies.
- Setting measurable objectives and targets to improve environmental performance.
- Reducing carbon emissions and manage climate change impacts in line with relevant State, National and international commitments.
- Protecting and enhancing natural habitats, biodiversity and improving resource efficiency.
- Meeting obligations under the TasPorts, Environment Protection Authority, and Marine and Safety Tasmania Deed of Agreement, including emergency preparedness and marine spill response capability.
- Reporting and investigating environmental incidents, non-compliances, near misses and complaints, and applying corrective actions to prevent recurrence.
- Monitoring, reviewing and publishing environmental performance annually.
