

Title: Depth declaration – Berth #7

Port: Port of Burnie

References: HMI 20-02E Minimum Declared Depths (Burnie)

Description: Following an interim hydrographic survey in the Port of Burnie using enhanced survey technics and high-definition data, shoaling has been detected within the berth pocket for Burnie #7 between 50-110m meterage marks. Processing of the remaining data set for the Port is continuing and will be released in due course.

The following declared depth is now applicable:

Berth	Minimum Depth
No. 7 Berth	10.65m
- Max beam 39m	
- Stern at 190m mark	
- Vessels with LOA to 230m
